Our lab is recruiting infants & young children from 3-12 months for research studies on cultural learning*. Among the questions we’re exploring include: how children learn from others and from computers as well as whether they can identify helpful versus unhelpful characters.

Study sessions are one 15-30 minute visit involving your child using computers equipped with state-of-the-art touch screen and eyetracking technology to make the tests into fun games for the kids!

*Children cannot be on any prescription medication or have a history of learning or psychiatric illness.

PARENTS WILL BE COMPENSATED WITH $20 FOR THEIR TIME AND COST OF TRAVEL.

To enroll in the study visit: www.recruitment.subiaul.com

If you have questions about the study contact: ChildLab@gwu.edu
